

THERMAL INSULATED PRODUCTS

DEC International® produces different thermically insulated products for several purposes. The thermic insulation is suitable for preventing condensation and minimizing heat loss and loss of cold.

The **thermically insulated** product series consist of:

The **ISODEC®** series:

The **ISODEC®** series consists of an aluminium laminate inner duct, thermically insulated with a glass wool layer and provided with an either glass fibre strengthened outer jacket.

The **ISOSLEEVE:**

The **ISOSLEEVE** consists of an aluminium laminate outer jacket, strengthened with glass fibre and provided with a glass wool insulation layer.

The **ISODEC®** fulfills all the requirements and are classified as specified within:

EN 13180 : " *Ventilation for buildings-Ductwork-Dimensions and mechanical requirements for flexible ducts*"

Range of application in practice

- Insulation in ventilation and air supply systems
- Air conditioning systems
- Thermic insulation in order to prevent heat loss or loss of cold
- Preventing of condensation in ventilation systems

Restrictions in the range of application

The **ISODEC®** ducts are not suitable for transporting air with a high concentration of acid and base. Neither are the **ISODEC®** ducts suitable for discharging combustion gases.

PLEASE NOTICE:

The consultant is responsible for the actual installation and mounting of the product. The mentioned values with respect to temperatures are not appropriate to be used to determine the physical properties. These properties are also dependent on humidity and the temperature of the air inside and outside of the H.V.A.C. system.

According to NEN 3883 tested by TNO:

- Flame spread: class1
- Flame transfer: class1
- Smoke figure: 2

To select the appropriate thermically insulated product, consult the table on the next page.

Product specific properties ISODEC®

The **ISODEC®** is also available, on request, with a 50 mm glass wool layer, the article number is: DI(X)50{Ø}

- Material structure: - aluminium laminate / glass wool / aluminium laminate.
- Construction:
 - inner duct : aluminum, polyester laminate.
 - glass wool blanket : 25 (or 50) mm, 16 kg/m³.
 - outer jacket : aluminum, polyester laminate.
- R-value glass wool: 0.69 (25 mm) or 1.4 (50 mm) m²K/W (ASTM C177-76).

Version 2008 www.decinternational.com

Range of application in practice

- Insulation in air supply systems
- Air conditioning systems
- Insulation of rainwater discharge
- Reducing of heat loss
- Preventing/discharging of condensation

Restrictions in the range of application

The **ISOSLEEVE 25** (or **50**) is not suitable in rooms with a high concentration of acid and base.

Barrier

The **ISOSLEEVE 25** (and **50**) has standard a barrier. The barrier simplifies the mounting, and the installer will not have unnecessary contact with the glass wool.

The article numbers for the **ISOSLEEVE 25** and **50** with barrier are resp. **DHB{Ø}** and **DHB50{Ø}**.
